*7' Horizontal V-Groove Panel, Oak finish*

This could be the  
**most beautiful**

wood garage door you've ever seen.

Except it's  
**not wood.**

Model 9800 uses the Accugrain™ technology of Therma-Tru™, the most respected name in fiberglass doors. The artfully molded wood-grain fiberglass surface, combined with durable steel construction, produces a realistic, natural-looking wood texture, pattern and appearance. It won't warp, crack or rot like wood, or dent like steel might, providing years of outstanding performance and beauty.

### performance features

#### **Insulation**

Model 9800 comes with foamed-in-place polyurethane insulation with an R-value of 7.6\*, which can improve your home's thermal efficiency, block street noise and make the door operate more quietly.

#### **Bottom Weather Seal**

This bulb shaped seal blocks draft and debris from entering the garage.

#### **Pinch-Resistant Panels**

Pinch-resistant door panels help push fingers out of harm's way if accidentally placed near a closing door.

#### **Torquemaster® Plus Counterbalance\*\***

Wayne Dalton's exclusive counterbalance system safely and cleanly contains the springs inside a steel tube.

\* Wayne Dalton uses a calculated door section R-value for our insulated doors.

\*\* Available for Vertical Raised, Horizontal Raised and Horizontal V-Groove Panels up to 9'x8' and Sonoma Panel up to 9'x7'.

Model 9800 garage doors are backed by a limited lifetime warranty on steel backer and a three-year limited warranty against delamination. Warranties vary by model series, and are available upon request. See full text of warranty for details.
